THE ABRIDGMENT OF THE DEBATES IN CONGRESS. By the author of "The Thirty Years' View." New York: D. Appleton & Co.

The debates in Congress contain in themselves the whole and most reliable political history of our country. They extend over a period of nearly quarters of a century and fill more than one red volumes. which cannot be purchased now for less than \$500, and are very cumbersome and inconvenient for reference. Col. Benton has undertaken the abridgment of these debates so as to present our parliamentary history within a compass more convenient to the student and within the means of private iudividuals. No man in the nation is better fitted for this task than Thomas H. Benton, who has spent so many years in Congress, and is familiar with all the leading incidents of our Congressional history.

The a'-ridgment will not be restricted to the speeches of the celebrated orators, but will be sufficiently extensive to afford ample information upon all interesting subjects comprised in the debates. The compiler, while he retains the substance of all the debates of the slightest interest, will exclude all unimportant matter.

This abridgment, considering the inestimable valthe country forms a treasury of knowledge which should be possessed by every citizen who can afford to Baltimore, Washington, Philadelphia, and New it. In it the people will have, for the first time, an York. GOLD IN WISCONSIN .- Mr. Wan. Delaney, a citizen of Chicago, exhibited in that city, a few days ago, a piece of gold bearing quartz, found near Waupaca, in Wisconsin; also, a specimen of pure gold, dug from a cellar in the same vicinity. The quarts specimen is quite rich in the precious metal. The particles are plainly visible to the eye, scattered in profusion over the surface of the rock. Part-cles of gold as large as a pea have frequently been dug out of the ground in the vicinity of Waupaca.

Onto STATE INTEREST .- The Ohio State authorities are advised by a dispatch from Auditor Wright, now in New York, that all matnred drafts remitted on account of the July interest have been paid, and obligations of the State falling due next week are provided for in full. Notwithstanding the heavy drafts upon the Treasury by the late officials, by what it was pretty effectually depleted, no difficulty was experienced in protecting the State credit.

FIRE .- The alarm of tire yesterday afternoon originated from some trivial cause near Broadway and of \$550.

There were 8 feet 4 inches water in the canal and 5 feet 6 inches in the pass on the falls. Weather uery warm.

Steamboat Accident .- The sternwheeler D. A. Given, which was to start for Nashville vesterday evening, sprung aleak at the wharf yesterday, and was sinking very rapidly, when the pumps were set to work and she was unladen. The water at one time was up to her guards. She had several hundred barrels of freight in her hold, a small portion of which was damaged. The salt was shipped by the Kanawha agency. The boat will go into the dry dock to be repaired.

Arrangements were making last evening by the owners of the D. A. Given to turn her trip over to the Wm. Dixon, Capt. Baugh.

For New Orleans .- The fine steamer Woodford, Capt. Mathers, is advertised to leave for New Orleans this evening. She has superb accommodations. Capt. M. is one of the best boatmen on the Western waters, and Mcssrs. McLaughlin and Benedict, the clerks, are very efficient officers.

For Memphis .- The Northerner, Captain Smith, will leave at her usual hour to-day for Memphis. The N. has been running in the Memphis trade for about five months, and during that time has lost but one trip. Besides, she affords very elegant accom modations. Messrs. Archer and Mullikin, her clerks, are polite and attentive to all on board.

For St. Louis.-The star packet in the St. Louis line, the Alvin Adams, Capt. Lamb, leaves Portland for St. Louis to-day. The Adams has no compeer in speed in the trade, and in every other respect is equal to the finest boats.

The popular steamer Telegraph No. 3, Capt. Hildreth, is the mailboat for Cincinnati to-day.

THE SPENCER HOUSE, CINCINNATI.—The reputation of this House as one of the most comfortable and best conducted Hotels in the country is already widely known. It is under the management of gentlemen who attained a well-deserved popularity and extensive experience during their connection with the Louisville Hotel and Galt House in this city. In the whole list of first-class Hotel from Bostou to New Orleans, the traveler will not find one where guests are more carefully and comfortably attended and more sumptuously provided. The building is well adapted and conveniently arranged for the purpose for which it is designed, and comprises all the latest improvements and conveniences. The rooms are comfortable, and well ventillated and elegantly furnished, and the appointments of the dining room and the fare and the performances in the culiuary department can't be surpassed. With the pleasant countenance of our old friend France at the desk, the Spencer is as complete a Hotel in all the details of a first class house as any traveler would wish to take his ease in.

THE CELEBRATION OF THE FOURTH OF JULY .-The feeling with reference to the celebration of the rapidly approaching national anniversary appears to be absorbed by the intense interest that centers in the exercises to be had that day in Lexington. A vast number of our citizens will be in attendance upon the solemn and imposing ceremonies incident to laying the corner stone of the National Clay Monument.

We understand that the amplest and most extensive arrangements have been made in Lexington. Every house will be free to the visitors, and that genial, cordial, and world-renowned hospitality, for which the beautiful Athens of the West is famed, will be extended with the most lavish liberality.

Military companies from New Hampshire, New York, Cincinnati, St. Louis, Indianapolis, and other cities, will be in attendance. The Masonic order will be fully represented. Fire companies and others will also attend in great numbers.

Many of these will be obliged to pass through Louisville, and others, through preference, will take this city in their route to the celebration. We think it would be highly appropriate if our Mayor and the proper authorities would arrange for the proper reception of all such visitors, and the extension to them of the courtesies of the city during their stay The occasion commemorates a national event, and is in particular honor of the most national and Unionloving of our statesmen.

THE LATE MURDER IN TAYLOR COUNTY .- WE have already published several accounts concerning the murder of Henry Simpson, a wealthy farmer of Taylor county. It appears upon further investigation that the four white men charged with the crime (Elia, Henry, and Iere Staggs, and John Underwood, jr.,) have been acquitted of all connection with the terrible offeuse. They were examined fully before a Magistrate's court and liberated from custody. In addition the Commonwealth's Attorney, and a number of most respectable men in the community gave a written certificate, stating that the parties charged had been wrongfully nrrested and were innocent of any guilt in the matter.

The report published concerning the confession of Hunter and the recovery of seven hundred and eighty dollars, is altogether false.

Morals or Cuicago .- The moral condition of Chicago, boasted queen of the lakes, is of the most disreputable and deplorable character. Murders, affrays, robberies, assaults, drunkenness, and all kinds, classes, and conditions of crime prevail in that city. The Chicago papers of Weduesday publish a list of forty-one burglaries committed in that place during the present month. Most of them were of the most audacious character, and iu one a citizen, while defending his property from robbery, was

FALLS CITY GUARDS .- This fine military company is being thoroughly and efficiently organized, its members displaying the greatest energy. We are requested to say that all those who have not yet procured their uniforms should leave their measures by Monday next. It is highly important that the company should be fully equipped and uniformed, in order to participate in the glorious exercises of the 4th of July.

AMERICAN CENTRAL RAILROAD LINE .- The recent opening of the Parkersburg branch and Marietta railroads, completes another and very important link in the vast system of internal improvements which is binding the east and west in iron bonds. By this route travelers can reach the east sooner we believe than in any other manner. It is the only line leading direct to Baltimore and Washington City-passes through the grandest seenery, is admirably officered and managed, and presents the rarest inducements for those persons wishing to travel pleasantly and speedily. AN IMPORTANT CASE .- One Jonas Wyeth, of Massachusetts, some years ago went to Iowa, and, under the loose "prairie practice" that then prevailed in our district courts, obtained a decree of divorce from his wife, who resided in Cambridge, Massa-chusetts. Subsequently he paid his addresses to and married a young lady in Davenport. After this marriage the Supreme Court reversed the decree of divorce and declared it a nullity, whereupon Wyeth returned to his wife in Massachusests, where he now

In May of last year the grand jury of Scott county, Iowa, found a bill of indictment against him for bigamy; and the Governor issued a requisition for him as a fugitive from justice, and placed the warraut in the hands of Wm. DECISIONS OF THE COURT OF APPEALS OF KENTUCKY.

Schwitz Team, 1857.
Reported by John M. Harlan, Attorney at Law,
Frankfort, Kentucky.

Prankfort, Kentucky.

Prankfort, Kentucky.

Moxley, &c. vs Moxl y, &c. From Shelhy Circuit.

This was a controversy between the heirs at law and the devisees of S. B. Moxley, decased.

That part of the will of decedent under which the controversy arises is as follows, viz:

"First. My beloved wife, Martha D. Moxley, is to have the use of one-third of my landed estate during her life, and at her death that part, with the balance of my landed estate, is to be laid off into seven nart; to Mary Ann Silpman and her bodily heirs one part, to Flizab th Fullinweler and her bodily heirs one part, to Martha Moxley and her bodily heirs one part, to Martha Moxley and her bodily heirs one part, and Bakenore and her bodily heirs one part. Anni my brother William Moxley is to have the use of my mill farm during his life."

The testator made no disposition of any other part of his estate, nor does his will contain any other devise, except the foregoing, or any expression which tendsto manifest his intention with respect to the matter in controversy between the parties.

The heirs at iaw claimed, by descent all the testator's

intention with respect to the matter in controversy between the parties.

The heirs at law clatmed, by descent, all the testator's real catet which was not devised for life to his widow and his brother until the termination of the widow's life estate, at which time, and not before, they contended, the other devises take effect, and the devisees become outlind to the devisees take effect, and the devisees become outlind to the the devisees contended that the will. On the other hand the devisee contended that the will invested them with a right to all the land immediately upon the duath of the testator, except that part of it which was devised for life, and that it is alone the division of it among the devisees which is postponed until the death of the willow.

Judge Simpson delivered the opinion of the Conrt. Reletid, if the language of the devise be construed according to its ordinary grammatical senee, it is evident that no interest in the land is given to the devisees during the

Held. If the language of the devise be construed according to its ordinary grammatical sense, it is evident that
no interest in the land is given to the devisees during the
life of the widow, but at her death the part devised to her,
with the balance of his landed estate, is to be divided
into seven parts, one of which he gives to each of the devisees. This is the time when they are to have the land
according to the provisions of the will. No disposition of it, in the meantime, was made by the testator, and
consequently it gives to his heirs at law during that time,
unless by some rule of construction the devisees are entitled to it, notwithstanding it has not been expressly devised to them.

It has been decided that where there is an express devise
of part of the inide to the person on whose decease the
general devise is to take effect, the words "at" or "after
the death." will be applied exclusively to the lands devised
expressly for life, by what is called the distributive construction, and the words of devise, without these expressions of postponenent, will be applied to the rest of the
property, which therefore passes lumediately to the devisees. This rule of construction was applied in the case
of Simpson and Horneby and Doe on dem, of Annandaie va Brazler, referred to by Jarman on Wills, vol. 1,
side page 471.

visce. This rule of construction was applied in the case of simpson and lloraely and Doe on dom. of Annandaic va Brazler, referred to by Jarman on Wills, vol. 1, side page 471.

It seems, however, that in the subsequent case of King vs. Inhabitants of Kingstead, 9 Barn. & Cress. 218, and which is referred to by the same author (kile) page 470, the court refused to apply to similar words a distributive construction, stating that in the above megioned cases the intention of the test ator as collected from the context of the will required such a construction as was given, and decided that natil the decase of the tenant for life, the estate not devised to her passed to the testator's heirs at law. Now, in this case, the courext of the will does not afford any evidence of an Intention on the part of the testator that the words at her death are to be applied exclusively to the lands devised to her, and one not to he applied to the rest of the property. And as the devise, while his to take effect at the death of the widow, is not to the heirs of the testator, although it embraces some of them, the rule, which would exclude the heirs in such a case on the ground that the testator cannot be supposed to his wife, that they should have any of it in the meantime, does not apply. When the devise is to the heirs of the testator, then the distributive rule of construction should prevently to the state could not pass to them as heirs, and unless it passed to them as devisees made the operation of this rule of construction, the widow, in a case like the present, would take by implication—it being a settled rule of construction that a devise to the heirs after the death of an other person creaks in that person an estate for life by implication. The context then widow, in a case like the present, would take by implication—it being a settled rule of construction that a devise to the heirs as the testator had expressly given to the widow as life estate in part of the land only, that he did not intend her to have any interest in the

SALT LAKE MAIL CONTRACT RESCINDED. - We learn from Independence that the postmaster at that place has received an official notice from the Postmaster General that the contract for carrying the mail to Salt Lake has been set aside. He is therefore ordered to withhold the mail till further orders.

The contract for carrying this mail was recently let out and taken by a company of Mormons at Salt Lake City, who have already made several trips under the contract. The government always reserves the right to recind mail contracts by giving notice and one month's pay to the contractors. This step is another indication of the strictness with which the government intends to deal with the mail robbers and law defiers of Salt Lake City.

The Friar's Point (Miss.) Valley Planter tells of a somewhat novel marriage that occurred a few days since in Coahoma county. The groom, it seems, had procured his license and was traveling with his intended bride on horseback. Passing by a farm, they came up with an ordained minister setting on the fence of his farm.

They requested him to solemnize the sacred rights of matrimony at once. He did not feel disposed to execute the ceremonial services there in the open field, away from any residence; but as they insisted so much, he sat npon the fence and they upon their horses and began the solemnization of the sacred rite. It was closed and they pursued their journey.

A Paris paper notices a curious experiment that has recently been made at St. Denis, at the residence of M. Gisquet, formerly Prefect of Police at the commencement of the reign of Louis Philippe, and now an oil refiner. By means of an apparatus invented by M. Bullot, and in which electricity is the only agent, six pounds of beef were boiled and perfectly cooked in five minutes and ten seconds. Several trustworthy wituesses, watch in hand, verified this rapid act of cookery. At the end of the 310 seconds the boiled meat and the broth made from it were tasted, and both were found to be excellent, although a little too salt-a fault, however, not attributable to the apparatus.

A fire at St. Louis on Thursday morning destroyed a building on Fourth street, occupied by James Spore, as an Artist's Emporium; Leathe & Boggs, as a picture frame repository and manufactory; and by Mr. Leathe, as a dwelling for his familv. Aggregate loss about \$20,000. Insured.

Kansas.-Election returns from Shawnee county. Kansas, are at hand, and show a similar result to that in Leavenworth county-the triumph of the Democratic ticket. The successful candidates are Messrs. Reed, Elmore, Hoogland, Whitaker, Cleinents, and Stevens,

A letter from Paoli, Lykins county, in the Territory, mentions that a murder was recently committed in that vicinity. A man, whose name is unknown, jumped the claim of another named Wright, living on Pottawatamie creek. When ordered off by the legal owner, Wright, he refused, and an altercation ensued, when he was shot dead.

The same letter mentions a tornado which passed through, blowing down trees, houses, and fences:

On yesterday evening, 7th instant, we were viited by a very severe tempest, which blew down the fencing of large fields, and tore up the trees right and left, scattering them along the road from the Wea Mission to the Missouri line. The town of Ossawatomie suffered severely. I learned from gentleman who lives there that Mr. Samuel Geer new hotel was blown over, and several other buildings, though, fortunately, no person was hurt. I have no doubt but that they will give in their taxes after such a fright.

LOUISVILLE AND SANDUSKY RAILROAD.—The Indianapolis Journal of Thursday says:

The election for directors of the road was to have taken place in Cambridge City on the 23d. This is, we believe, a new project. The proposed road will run through several of the southeastern and eastern counties of the State—giving to that rich region a direct outlet to the Ohio river and the Lakes Whether it has any connection with the enterprise commencing at New Albauv and running through commencing at New Albauy and running through the Mad River and Lake Erie Railro bellefontaine, we cannot say. It looks like it was a rival project of the last named road, on which the work has been abandoned for some time. FRESH MEAT NECESSARY TO LABOR .- In an elab orate paper by Dr. Lande, of the Imperial Academy of Medicine, Paris, recently read before its mem bers, he lays it down as a fundamental principle in the philosophy of diet, that the use of fresh meat daily is necessary to the health of the working classes, although he admits that persons leading a comparatively idle life may do very well on fish, poultry, and other lighter forms of nourishment. In support of his opinion he produced a number of facts of which the following some:

The Rouen railway company of France, having conceded the working if their line to English cugineers, the latter brought over a band of English laborers, who performed one-third more work daily than could be got out of the French laborers. The latter were put on meat diet, similar to the English workmen, and in a short time were able to do as much labor. If the conclusion of the doctor is cortect, it becomes a marter of political as well as of individual economy, that the price of fresh meat shall be reduced low enough to allow laborers to eat animal food, otherwise the wealth of the nation is in dauger of being diminished one-third.

We further hear that Flandrau is defeated as delegate at large, by the 550 Republican majority in Waseca county, and the "Rumor," is now confirmed that the Republicans have sent five delegates out of six from Goodhue district.

This makes the convention stand 60 Republicans 40 Democrats—and this will be about its com-

THE VARIETIES.

The army worm is exceedingly destructive in Bartholomew county, Ind. Wheat and rye fields have been totally destroyed. Farmers are everywhere at work digging trenches, and taking every other means to arrest their progress.

Wheat Harvest Commenced .- In Randolph county Southern Illinois, farmers have commenced cutting their wheat. The Chester Herald speaks of seeing a whole field "in shock."

All the fools are not dead yet. In Marion county, Ohio, a few days ago, a man sued another for the rent of a house. On the trial, evidence was adduced that the house was haunted, and the jury decided that defendant be paid \$15 and damages, instead of paying the rent.

Dreadful News .- There is a weekly paper in New York, which claims to be the official organ of the Latter Day Saints in that part of our benighted country. General News Summary.—We have only room for a line, and the most truthful summary is—
The world is going to hell as fast as possible.

Gen. Wood,—A letter from Troy says: You will e surprised and alarmed to learn that Major General Wool lies in a very precarious state at his residence in this city, laboring under a sudden and severe fit of illness, so severe that his recovery is a matter of doubt. The General during the past week has been suffering from a bad cold, produced by ex-posure during the recent inclement and dump weather, but was well enough to indulge on Saturday evening last in a game of billiards at the house of a friend. On Sunday the cold increased and resolved itself into pneuronia or inflammation of the lungs, which continued until yesterday, when the brenchitis, set in, stronger than all the Mexicans who were leagued against the old veteran at Buena Vista. This complication of diseases has rendered the General very low and feeble, and his life is really in very great danger.

A writer in the Bath Tribune speaking of the early history of the ancient town of Waldoboro', Me., says that in 1794 the German language was the only one used by a great majority of the inhabitants. Then all the schools were taught in German, so that the young (including what few English families lived in the town) all attended the German schools and learned the language.

Under the head of "longevity" the Matanzas pa-pers announce the death of a negro woman of that vicinity at the advanced age of 120 years. Under the same head the Villa Clara papers record the death of a Creole at the age of 165 years, leaving a wire, eighteen children, thirty-live grand children and a dozen great grandchildren! The most remark-able thing in the life of this last was that his first sickness was that which carried him to the grave.

Alfred DeMusset, a French poet of considerable reputation in Europe, but little known in the United States, died recently in Paris from the eeffects of habitual intoxication. He commenced during the early period of his literary career, to drink brandy while he wrote, in the same way that Byron drank gin as a sort of mental ctimulant. But the habit area wan him so that the drinking of ham. the habit grew on him so that the drinking of brandy and absinth brutalized him into a vile sot. He was a very handsome in in, and of aristocratic faunly, which, together with his wit and talent, caused him to be much sought after. He could have mar-ried wealth and beauty, but rejected the conditional temperance. Byron was his exemplar, and all his poetry shows plainly how much he imitated the English poet. He wrote many short comedies, which are still exceedingly popular in the Parisian thea-

A Scene of Retribution.—A picture representing the sale of a quantity of old furniture seized for rent was exhibited some years back in the window of a dealer in the Place de la Madeleioe, Paris, and attracted considerable attention. In the foreground was placed a poor woman holding in her arms a child and watching with a sorrowful eye the progress of the sale. The sweet face of the child stood out in strong contrast to the distressed connennace. out in strong contrast to the distressed countenance of the poor mother. Further pack were the personages connected with the sale, represented with great vigor. The following is stated by a Lyons journal

A few years since, the painter of the picture in question, an eninent artist at Lyons, while passeng through the Rue des Terreaux, approached a number of persons who were gathered together witman. A woman was seated on the pavement with a child in her arms. The painter spoke to her, and man. A woman was seated on the pavenent with a child in her arms. The painter speke to her, and was told that the furniture which was being sold belonged to her; that her husband had lately did, leaving her with the child she had in her arms; that she had struggled hard to maintain herself by working day and night and submitting to every privation, but that her laudlord had at length seized her furniture for some month's reul, which

The artist was much affected by this simple reci-tal, and inquired who was her landlord. "There s," replied the poor woman, pointing to a man was watching the progress of the sale; and be was recognized by the painter as a person who was suspected of having amassed a considerable fortune by usery, so that to make any appeal to his feelings on behalf of the poor widow would be useless. The artist was considering within himself what other plan he could adopt to benefit her, when the crier announced a picture for sale. It was a miserable daun, which in the summer the poor wom an ind used to hide the hole in the wall through which the pipe of the stove passed during the winter. It was up at one franc. The artist at once conceived a plan for taking revenge of the lindlord. He went over, examining the picture with great altention, and then called out with a lond voice, "One hundred france!" The landlord was astonished at the bid, but conceiving that a picture for which to eminent an artist could offer that sum was worth more than double, boldly offered 200f. "Five boudred!" said the painter, and the contest between the two

said the painter, and the conteat between the two bidders became so animated that the prize was at length knocked down to the landlord at 2.200f.

The parchaser then addressing the painter, said—
"In seeing an artist of your merit bid so eagedly for the picture I suppose that it must be valuable. Now tell me, sir, at what do you estimate its value?" "About three, francs and a half," replied the painter; "but I would not give that for it." 'You are surely jesting," said the landlord, "for you bid as high as 2,100f for it." "That is true," replied the artist, "and I will tell you why I did so. You are in possessiou of an income of 25,000f, a year, have seized on the furniture of a poor woman for a deut of 200f. I wished to give you a lessou, and you fell into my trap. Instead of the poor woman being your debtor, she is now your creditor, and I flatter myself you will not compel her to seize on yourfurniure for her debt." The artist then politely saluted the astonished landlord, and having announced luted the astonished landlord, and having announced her good fortune to the poor woman, walked away.

THE MANUFACTURE OF IRON AND STEEL.—We I see but little of late in the English papers concerning the Bessener process, which make so cunch exultation at one time, and promised a complete revolution in the manufacture of iron and steel. Indeed, what little we do find now is unfavorable. There are vague hints of difficulties in the practice of the system not anticipated, and some intimations, also, that the process was known and tried years ago, but found to be inefficient. It is not unlikely, judging from these statements, that the process is one of the from these statements, that the process is one of the numerous futile expedients, hundreds of which come up in every community, as promising as Jonah's gourd, and wither as rapidly hefore the exposure of actual life and practical action.

The miserable quality of the great portion of iron manufactured for some years past, and which has caused not only great deterioration in the value of all manufactures into which iron in any form enters, but has also involved great destruction of property and loss of life, particularly on the ocean, by ferior strength and durability, which was not known till it was subjected to actual wear, causes much re-gret that some easy process of making better iron is not discovered.

method pursued in the manufacture of fron, pure iron is not produced; that being done hy the arts of chemistry, if at all. As briefly described by a scientific writer, the iron produced is cast iron, which consists mainly of iron, but is contamination, which consists mainly of iron, but is contamination. inated by a great variety of impurities, from which it is difficult to free it; existing as they do in some form of combination in the material employed, and which are so affected during the reduction of the iron as to assume a state in which they can compine with iron, and hence the iron drawn from the furnace is invariably contaminated with them. Although small in quantity, the effect which these impurities have upon the physical proprieties of the iron is truly wonderful. One per cent. of phosphorous, or a scarcely larger proportion of sulphur, has a most prejudicial effect upon the non containing it. The principal element which, in the blast furnace, enters nto combination with iron, is carbon of charcoal The metal is capable of combining with five per cent. of its weight of carbou, and many kinds of cast iron contain nearly this quantity.

cast iron contain nearly this quantity.

Steel is a combination of iron and carbon, containing less carbon than cast-iron, and the production of steel from cast-iron is simply the removal of a portion of the carbon. If cast-iron from the blast furnace consisted of iron and carbon only, the production of steel and wrought-iron therefrom would be applied. easily effected; but cast-iron contains besides iron and carbon, the following impurities, some or all of them: silica, sulphur, pho-phorus, and, in minute quantities, alluminum, calcium, and potassinm. The change of cast-iron into wrought-iron consists in the removal of impurities, and, for effecting this, Mr. Bessemer's invention was claimed to possess'a great advantage over the usual process.

THE FACTS IN THE CASE. — The present controversy existing between the Buffalo & Eric Railroad Company and the New York & Eric Railroad Company, with the unprecedented course pursued by the officers of the former, has cause much astonishment, not only unlong the officers of other lines but the traveling public, who claim ordinary facilities, and yery justly so for the character dishus conferred. and very justly so, for the chartered rights conferred on Railroad corporations. There is a principle involved in this controversy not visible to the supericial observer; consequently the true position of the N. Y. & E. R. Co. cannot be fully appreciated

inhout a statement of some facts.

In 1852 the N. Y. & E. R. R. Co. commenced to build a continuation of their track from Dunkirk to the Pennsylvania State line, to connect with a line already built from Erict osaid State line, which was called the Eric and Northeast Railroad Company, so familiar in the Harsor Creek war. The Buffalo and Eric Railroad Company was organized and was constructing a rival line to the same point, when constructing a rival line to the same point, when the officers of these lines accidentally compared notes, and found that the Eric and Northeast Comhad entered into conflicting obligations with

both lines for a connection.

It was then deemed advisable by both parties to agree on a compromise gange, and build a number to serve the interests of the New York Central and New York and Erie without prejudice to either; thereupon a contract was drawn up to suit all par-ties, and signed and sealed by the proper officers of each company, binding them to the following con-

ditions: 1st. That the N. Y. & E. R. R. Co. was to abandon the continuation of their line west of Dunkirk and sell out all material already contracted for such line to the Buffalo and Eric Radroad, which should one to the Buffalo and Eric Kalifold, which should be a consideration for certain privileges granted to the former company. The Buffalo and Eric Railroad Company bound themselves to the running of a sufficient number of trains to do the passenger and freight traffic of the N. Y. & E. R. R. from Dundrich and the sufficient number of trains to do the passenger and freight traffic of the N. Y. & E. R. R. from Dundrich and the sufficient results of the N. Y. & E. R. R. from Dundrich and the sufficient results of the N. Y. & E. R. R. from Dundrich and the sufficient results of the N. Y. & E. R. R. from Dundrich and the sufficient results of the sufficient results o kirk, and if the ordinary trains run through from Buffalo to Erie would not accommodate the N. Y. & E. R. R. Co. they should run special trains, both for freight and passengers, to and from Dunkirk and Erie and charge uniform rates per mile on their entire line; 10 refrain from any influence for or against either the N. Y. Central or the N. Y. & Erie road. The N. Y. Central and the N. Y. & Erie road binding themselves 10 nothing but to refrain from any external and the N. This is the sun and snostance of the bond made in good faith, no conditions being contained therein restricting either the N. Y. C. or the N. Y. & E. R. R. Co. to any specific tariffs on their respective lines. Co. to any specific tarits on their respective lines. Subsequent to be date of this bond, the N. Y. & E. R. R. obtained a connection with Buffalo through the Buffalo and New York City R. R., and applied to the Buffalo and Eric Railroad Company for a connection at Buffalo having the same facilities extended to them for an exchange of passeng is and freights as was given to the N. Y. C. R. R. Co, and they have been universally met with a replyour bond recognizes a terminus of the New York and Eric Railroad Company at Dunkirk, and there only. This bond recognizes the right to the N. Y. & E. R. R. Co. to make such rates as they see lit to and from Dankirk and st no other point in connection with Dankirk and at no other point in connection with

the Buff lo and Eric Railroad.
Therespou the N. Y. & E. R. R. Co have been compelled to act, acknowledging the validity of the said bond, and, assuming this right, they have been met with the extraordinary manifesto recently issued by the Buffalo and Eric Company to other companies, whose name and number is legion, to discontinue sales of coupon tickets to Dunkirs, or any usual cars of Dunkirs with the N. Y. & E. Ballany point east of Dunkirk via the N. Y. & E. Rallroad; also to charge the same rate on freights a passengers to Dankirk as is charged to Buffalmaking rates for forty-eight miles same as on eigh ty-eight unites, thus discriminating against the K. r. & E. R. R. and in layor of the N. Y. C. R. R., which is a complete violation of the bond, and left the N. Y. & E. R. R. to seek its only remedy before

a legal tribunal.
So lour as he N. Y. & E. R. R. Co. is not recognized and placed on a similar footing with the N. Y. C. R. R. at Buffalo, by the Buffalo & Erie R. R. Ca., they cannot claim of the former Company more than is "nominated in the bund;" they can take "the pound of flesh, nut not our drop of blood." But the secret of all the trouve lies with the selfsacrificing, magnanimous officers of the N.Y. C. R. R. (?) who have the controlling interest in the Buffalo & Erie R. R. by owning a in jority of the stock, and they have dured o assert that railroad contracts are made to be violated, and rather than yield to the conditions of the bond and give to the N.Y. & E. the conditions of the bond and give to the N. Y. & E. R. R. Co. equal facilities with the medies over the Buffalo & Erie R. R., they are ready to sucrifice not only this line but some three thousand miles of railroad west and southwest of them. If the present condidition of thin, a is to exist in all time, without remedy, the N. Y. & E. R. R. might as well terminate forty-eight miles east of Buffalo, and depend on the N. Y. C. R. K. to do their business West. Time and observating have demonstrated that two-thirds of the revenue. have demonstrated that two-thirds of the revenue received by lines in the west and southwest, represe ting near two hundred millions capital, depends on proper connection with the N. Y. & E. R. R., which N. Y. City and the West what the main are the human system. Cut it off, and you cut is to the human system. Cut it off, and you cut if an avenue which carries three-fourths of the trait c to the West and southwest, to and from N. Y. City. Ihen, I a k, are all these lines and the immense capital interested, and the commercial interests of N. Y. City to be sacrificed for the want of the immediate completion of forty-eight miles of railroad, to be freed from a continuance of things as they exist at present. If so, let railroad companies, as well as individuals, bare their necks to this old and arrogant monopoly, and say we are willing sut jects.

POLICE PROCEEDINGS-Friday, June 26th .- Another "good Friday" with nothing to dem nd the attention of the Court, save an ugly, unsightly hedge of hawthorns. Edward, William, and Mary Hawthorn and Rebecca Smith had been arrested as suspected felons. A large lot of property, supposed to be stolen, was found in their possession. They plead their innocence, but with no success despite the tears of one of them, and the entreaties of their mother. It was thought that they would be more safe and free from temptation in the Workhouse than in the city, and were accordingly despatched there by Mr. Hill's mule express.

The State Republican Convention has nominated Lot M. Merrill for Governor by a vote of 385 against 16. Resolutions were adopted advising stronger vindication of State sovereignty on the part of free States, condemning the Dred Scott decision, favoring the election of federal officers by popular vote and recommending the withdrawal of the liquor question from the politics of the day.

CONCOUD, June 25. The Legislature passed a resolution condemning the Dred Scott decision. The House has purged the negro disability clause from the militia bill.

HARTFORD, June 25. The committee of investigation on the affray which occurred in the State House yesterday between Messrs. James E. Dunham, William E. Noble of Bridgeport, and Judge Brooks, member of the House, have reported that the parties were excited over remarks made in the House by Mr. Brooks and those of Mr. Dunham to Mr. Brooks; that Mr. Dunham to Mr. Brooks; that Mr. Dunham to Mr. Brooks; the those of Mr. Dunham to Mr. Brooks; that Mr. Dunham had apologised to the House through the committe, and that Mr. Brooks would apologise directly to the House. The report was accepted and the matter thus settled. The personal violence reported appears to have been little more than excited language of the parties in the difficulty owing to the bank question, Mr. Dunham being a Bank Commissioner of State and Mr. Brooks a member of the Committee on Banks in the House.

[Correspondence of the N. Y. Commercial Advertiser.]

LONDON, June 12, 1857. The prospect of the grain harvest, the silk crop, and the vintage constitutes for the moment the chief European question. With regard to the first, magnificent expectations continue to be entertained. On the second, there can be little doubt that, notwith the second, there can be little doubt that, notwith-standing the favorable commencement, the result will be as bad, if not worse, than last year. The third, the vintage, seems likely to rival the grain produce, and to redeem the failures of several

years.
Still, the whole of these anticipations are liable to change. The disastrous portion of them is nnhappily that which is least likely to undergo modification and the strength and wave of the strength and the ly that which is least likely to undergo modifica-tion, the silk crop being now sufficiently advanced to preclude the possibility of its unfavorable fea-tures being so far counteracted as to admit even of a moderate yield. The vintage and the wheat har-vest, however, although with a critical period yet before them, are in a position to warrant great con-fidence. A month of warm weather has brought both the fruit and the grain rapidly toward matuni-ty, and they have consequently attained a degree of strength that will enable them to resist attacks which might be fatal in a more backward stage. As respects the English grain crops, not only has the respects the English grain crops, not only has the season been highly favorable up to the present date, but there are indications of a probable period of fine but there are indications of a probable period of fine weather when the time arrives for securing them. If June is a dry month, there is always reason to apprehend the setting in of rain about the middle of July, when it continues with a pertinacity which from time immemorial has strengthened the tradition of St. Swithin. This June, however, the falls of rain have thus far been copious, and there is every prospect that they will continue at intervals for some time longer. Hence we may lope for comparative immunity in July and August, and, if this should be realized the quantity and quality of all should be realized, the quantity and quality of all descriptions of grain can scarcely fail to be much

beyond an average.

The slow but steady improvement in the London money market, which the readers of the Commercial Advertiser have been led to expect, still continues; and there is even some tendency to discuss the possibility of an early reduction in the bank rate of discount from 6½ to 6 per cent. Had it not been for the nnfavorable quotations of the Chinese exchang-es, reported by the two last mails, and the discourag-ing turn of the silk crop in France and Italy, a downward inovement of a half or perhaps even of one per cent. would already have occurred. Under existing circumstances great caution will continue to be exercised. The stock of bullion in the bank has nearly recovered to a point which would war-rant a reduction to 6 per cent.; but during the last t wo years each gleam of ease has proved so transient, that there is now a general indisposition to take for granted that any improvement will be permanent. Although, however, it is quite impossible that a

Although, however, it is quite impossible that a rapid rebound can take place, the signs are stronger than at any former period that the present satisfactory tendency will not receive any serious check. The market will of course be greatly influenced by each fortnightly arrival from Iudia and Chiua, but even if these should not bring better tidings as to the prospect of a mitigation of the drain of silver, they are not likely to make matters worse than they are. Should they, on the contrary, announce any sudden diminution in the specie demand, the effect in an encouraging direction will be very great. The in an encouraging direction will be very great. The opinion, therefore, is that, supposing everything to go on well with respect to the appearance of the grain crops, and Indian and Chinese affairs to remain without improvement, a reduction of the bank rate to 6 per cent., but not lower, may be hoped in the course of a week or two or at all events, the the course of a week or two, or at all even's by the beginning of July; while supposing the appearance of the grain crops and the accounts from China to be both satisfactory, a reduction to 51/2 per cent. will be very probable. Below that point few persons will be sanguine enough to expect an early descent. will be sanguine enough to expect an early descent. Within the next three months we have a sum equal to \$5,625,000 to pay Denmark, as our quota for the a bolition of the Sound dues, and this is of sufficient magnitude to interpose a considerable check to any manifestations of buoyancy. extraordinary manifestations of buoyancy.

On the Paris Bourse there has been no revival of

prices, but the monthly statement of the Bank of France published to-day is surprisingly pleasant, from an unusual augmentation in the stock of specie, an addition of more than \$10,000,000 having occurred within the four weeks. The only drawbacks are that three-fourths of the amount were obtained by artificial purchases of gold at a premium in England, America, and elsewhere, and that there is reason to believe a falling off would at once commence if these were discontinued. Still the fact of prices, but the monthly statement of the Bank of mence if these were discontinued. Still the fact of an increase having been obtained by any means is calculated to inspire some confidence, since the returns of previous months have shown that, even in the face of artificial purchases of gold fully equal to those now effected, the stock of bullion has not even been preserved from actual diminution.

The knowledge that the above return would be of a cheerful character, led the Parisian speculators to a thorough conviction that the Bank of Fran a thorough conviction that the Bank of France would yesterday lower their rate of discount from 6 to 5½ per cent. Indeed some of the directors themselves positively asserted that such would be the case. It appears, however, that during the last week there have been symptems that the influx of bullion would prove only temporary. The new Governor, M. de Germiny, who was yesterday installed in the place of Count D'Argout, was therefore afraid to inaugurate his career by an act which perhaps, a few days would demonstrate to have been perhaps, a few days would demonstrate to have been most imprudent. To offer money upon reduced terms, while they are unable to secure their own solvency except hy buying gold above the market price, would be a preposterous proceeding; and the contract with the Rothchilds for the last supply having been fulfilled, they were obliged vesterday to enter into a new one for \$5,000,000. Nevertheless it was strongly believed that for the sake of influencing the approaching elections the Bank would

The text of the treaty between England and Persia was yesterday published, and is regarded with general satisfaction. It secures everything originally demanded, but le ves the Persian territory intact. Russia is foiled by stipulations that no privileges are to be accorded to other nations without similar rights being conferred upon us, and the re-establishment of respect for British influence will be achieved by a distinguished reception being given, with public apologies, to our insulted plenipotentiary, Mr. Murzay. The sole objection that can be suggested to the treaty is that it fails to provide that Persia shall pay the expenses of the war. The only way, bowever, in which she could have made such payment would have been by a cession of territory, and this was the very thing which the British diplomatists were most anxious to discourage.

most anxious to discourage.

One of the largest fires which has happened in London during the last twenty years, occurred a few nights since, the goods depot of the London and Northwestern Railway at Camden town (a suburb adjoining Regent's Park) having been totally destroyed. The conflagration commenced sudienty, about 10 in the evening, while a number of clerks and others were employed on the premises, and in the course of a few minutes it became evident that the whole of the buildings, covering five acres, with the multitude of tracks and goods which they con-tained, would be swept away. The loss has been stated to be equal to \$1,250,000, but probably about one-third or half that amount would be more accu-rate. Under the buildings were 350 valuable horses, beloaging to Messrs. Pickford, the carriers, by whom the business of the station was carried on, and there was only just time to drive them out and to leave

them to ran off wherever they pleased.

Consols at the last date were quoted 94% for the
July account. They have since advanced to 94%, and have closed this evening at that price, or 93%

sx-dividend.

The next steamer from this side will be the Herman, on the 17th of June. Our last advices from New York are to the 30th of May.

The process of spinning this portion of the cable occupied 80 days. The cable was bein transferred to small vessels, to be transhipped on board the Niagara as soon as she arrived in the Mersey, which it was expected would be in the course of a few days. Experiments with the cable demonstrated in the most satisfactory manner that telegraphic communication along the whole length of wire was perfect.

The prosecution will be conducted by the Attorney General, assisted by Mr. Edwin James, Q. Prussla.—The Berlin correspondent of the London

Times writes:
The police, it is understood, have obtained a clue to a wide-spread conspiracy among the working classes for the purpose of briging about a general strike in all trade on the same day in Germany, Belgium, and Switzerland. The instigation of this plan is traced to Belgium, while similar plans which have lately been detected in France were traced to Eugland. The police of Berlin have accordingly made a communication to the municipal magistracy the latter have made it known to the heads of the various trades companies, with the additional injunction that the very first symptom of anything like a suspension of work by whole shops or any number of workmen, shall be communicated direct to the police who will then take the promptest steps. As yet no such symptom has exhibited itself.

CIRCULAR.

Towar Bulldings, North,
Liverpool, Juno 12.

Tobacco.—The sales during the past week are about 150
hids—the market heing quiet, without change in prices; we
therefore confirm quotations in our last.

Bacon.—The inquiry noised at the close of last week has
not realized the expectations of holders, and thus far the
sales to the trade have been purely of a retail character,
and usually of the more unexceptional branks; a new feature, however, is presented in the return of some 500 hys to
the United States. In London stocks remain lucousiderable, as they are at Glasgow, and a demand upon either of
these points would result in an increase di nquiry here. We
quote—long middles, boneless, 54s 6d@55s; rib in 50s@55s;
short middles, boneless, 54s 6d@55s; rib in 55s@54s; Cumberlaud 4bs@52a.

berlaud 49:63528.

Beef and Pork.—Beef has further declined, and sales have been made at 127s #6.61508—the outside figure obtainable only for the most choice. Pork is very quiet, the value being nominally 908:6028 fd.

Lard.—About 1,000 hills and tees have changed hands during the week at 63s 6038 fd.—the market closing dull. We learn that part of the late receipts are being returned to New York.
